SA-AP-02 Applications Programmer, Senior

Duties:

Analyzes functional business applications and design specifications for functional areas such as finance, accounting, personnel, public safety, social services, procurement, legal support services, and transportation. Develops block diagrams and logic flowcharts. Translates detailed design into computer software. Tests, debugs, and refines the computer software to produce the required product. Prepares required documentation, including both program-level and user-level documentation. Enhances software to reduce operating time or improve efficiency. Provides technical direction to programmers as required to ensure program deadlines are met.

Education:

BS from an accredited college or university with a major in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline.

General Experience:

Must have seven (7) years of computer experience in information systems design.

Specialized Experience:

At least five (5) years of experience as an application programmer on large-scale DBMS, knowledge of computer equipment, and ability to develop complex software to satisfy design objectives.
